

YLVA RYNGEBO OF TYRESO

The overall Platinum International EUWIIN Inventor Award Winner 2013

Ylva is the Managing Director of Medical Innovation Design (MID) AB. Her invention "X-ray protection - the MID way" relates to products that help to lower the radiation dose and help make patient examinations safer. She was a radiographer with over twenty years of work in healthcare.

She became tired of products that did not work satisfactorily therefore with her experience she began to invent products in diagnostic radiology with high quality, safety and design.
